<p data-bbox="189 330 562 368">Anatomy and Physiology</p> 	<p data-bbox="935 310 1743 385">Anatomy & Physiology – A Therapist’s Refresher With Case Studies- First Line Education Inc.</p>	<p data-bbox="1762 310 2915 550">First Line Education Inc. is a team of health care professionals that offer in person and online courses in soft skills and business, assessment, movement, and soft tissue therapy. This one-day refresher will workshop how to apply collective anatomy and physiology knowledge in a functional way to resolve the case studies presented in the course. Join the First Line team for a fun and interactive way to double check your anatomy smarts!</p>
<p data-bbox="189 655 662 693">Ergonomics and Biomechanics</p> 	<p data-bbox="935 598 1473 637">Institute for Work & Health Website</p>	<p data-bbox="1762 598 2915 792">The Institute for Work & Health is an independent, not-for-profit research organization. Their goal is to protect and improve the health and safety of working people by providing useful, relevant research in areas of primary prevention and secondary prevention in the workplace through research in musculoskeletal disorder prevention.</p>
	<p data-bbox="935 804 1457 842">Workplace Disability Management</p>	<p data-bbox="1762 804 2915 1038">This document examines workplaces setting up accommodation and return-to-work (RTW) programs to help ensure employees with work-related and non-work related injuries and illnesses are able to remain at work or return to work as quickly as they are safely able to do so. It also examines system-level programs (i.e. those offered by workers’ compensation boards) that support workplaces in doing so.</p>
	<p data-bbox="935 1046 1609 1084">Clinical Treatment and Health Measurement</p>	<p data-bbox="1762 1046 2915 1159">The Institute for Work & Health looks at what treatments and rehabilitation programs are available to injured workers to ensure their full and speedy recovery.</p>
	<p data-bbox="935 1167 1277 1205">IWH Tools and Guides</p>	<p data-bbox="1762 1167 2915 1360">This tool is based on the Institute for Work & Health <i>Seven Principles for Successful Return to Work</i> and provides an evidence informed guide to be used by anyone in the workplace who supports workers with depression as they cope with their symptoms while working or when they are returning to work following an episode.</p>
	<p data-bbox="935 1372 1541 1411">Workplace OHS programs and practices</p>	<p data-bbox="1762 1372 2915 1526">This document provides information on how workplaces play a vital role in ensuring the well-being of workers and knowing what occupational health and safety (OHS) practices are most effective in preventing injury and illness.</p>
	<p data-bbox="935 1534 1659 1608">The Institut de Recherche Robert-Sauvé (IRSST) Website</p>	<p data-bbox="1762 1534 2915 1687">This is one of the leading occupational health and safety research centres in Canada. The Robert-Sauvé Institute funds research to eliminate health and safety risks for workers, as well as rehabilitation and return to work practices.</p>
	<p data-bbox="935 1695 1317 1733">Awareness-Raising Tools</p>	<p data-bbox="1762 1695 2915 1806">A publication provided by the Institut de Recherche Robert- Sauvé (IRSST) that lists the various guides and technical awareness tools by field in accessing information and reports.</p>

	Independent Medical Exam Care Centre- Functional Capacity Evaluation Guide	This document looks at the evaluation of an injured party that uses a third party, independent medical professional who provides unbiased medical evaluation for a specific case. In a Functional Capacity Evaluation, these are a series of tests used to evaluate a worker's physical abilities.
	Canadian Centre for Occupational Health and Safety- Health and Wellness	This legislation regulates each province's jurisdiction over its OHS outlining the rights and responsibilities of the employer, the supervisor and the worker. It provides numerous resources dedicated to the health and wellness of workers and employees.
	Centre of Research Expertise on Musculoskeletal Disorders	This organization, made up of 47 dedicated researchers across 13 different institutions in Ontario, conducts research to improve the understanding of musculoskeletal disorders and their impact on worker related absences.
	The International Seating Symposium	A conference designed to assist healthcare providers and others to improve seating and mobility for people with disabilities.
	WSIB- Musculoskeletal Disorders Prevention	A three-part musculoskeletal disorder prevention series aimed at controlling hazards in the workplace that could lead to MSD's.
	Safety Smart Magazine	Safety talks, safety training materials, and health and safety resources for workers and employers.
	National Ergonomics Conference (American)	This event, known as the ErgoExpo, has been providing professionals across various industries the tools, strategies and latest approaches to learn to build or enhance an existing ergonomic or safety program.
	Occupational Health and Safety Act	Ontario workplace safety legislation. The <i>Occupational and Safety Act</i> sets out the rights and duties of all parties in the workplace, as well as procedures for dealing with workplace hazards and for enforcement as needed.
	Government of Canada- Workplace Safety	Canadian policy for workplace safety and rights for Canadian employees. The Canada Labour Code gives workplace parties (employers and employees) a stronger role in identifying and resolving health and safety concerns.
Informed Consent 	Canadian Medical Protective Agency- Consent	Guide for Canadian physicians covers emergency treatment, types of consent, capacity, requirements for informed consent and a sample consent form.
	College of Nurses Practice Guideline - Consent	This guideline defines consent, how to obtain consent, substitute decision makers and explains how they can act to provide consent.
	Provincial Advocate for Children and Youth- Children's Health Rights	The Ombudsman's Office is responsible for advocating for the protection of children and youth, and provides a guide for young people on how to make their own healthcare decisions and navigate their rights.

	College of Audiologists and Speech Language Pathologists of Ontario- Consent and Capacity Module	This guide is intended to help members understand the necessary steps to obtaining consent. The module consists of four chapters that include resource information, types of consent, determining capacity and substitute decision makers.
<p>Assessment, Exercise Prescription, Treatment, and Therapy</p> 	Posture, Balance and Gait Basics- First Line Education Inc.	Every good initial session with a client begins with a thorough evaluation of their movement ability and an exploration of the areas of their body that do not move as they should. This two-day course explores the stability and rigidity of the feet, shoe choices, orthotic prescription and use and various ankle movement strategies.
	Functional Testing for the Upper and Lower Body- First Line Education Inc.	Get a simple introduction to why functional screens are an important part of your assessment protocol. See how the functional tests are evaluated and scored. Watch how introductory therapeutic exercises can be built from the faulty movement patterns that you see.
	Biomechanical Evaluation for the Lower Body- First Line Education	This two-day course continues on from the <i>Assessment From The Ground Up</i> course. Learn how to evaluate fascial and muscle imbalances, identify the drivers of compensatory movement patterns, check muscle endurance, strength and develop early stage exercise therapy protocols.
	Biomechanical Evaluation for the Upper Body- First Line Education	Continuing to the upper body, join First Line for this two-day investigation of the upper body's fascial lines, expected movement patterns, possible compensation patterns, and tests for muscle awareness, endurance and strength. Start to build out simple exercise therapy programs for all levels of client rehabilitation.
	Annual International Conference on Kinesiology and Exercise Science	The aim of the conference is to bring together scholars and students of all areas of applied and integrated health sciences, including physiology, assessment, health psychology, health promotion, epidemiology, biomechanics, sports medicine, training methods, nutrition and physical education.
	Canadian Society for Exercise Physiology (CSEP)	CSEP is a voluntary organization composed of professionals interested and involved in the scientific study of exercise physiology, exercise biochemistry, fitness and health. It was founded at the Pan-American Games, Winnipeg, Manitoba in 1967. A link to educational opportunities is provided by CSEP.
	Introduction To Therapeutic Exercise- First Line Education Inc.	First Line Education Inc. offers this two-day course either online or in-person. You will learn how to put together therapeutic exercises for clients, understanding the order of your programming, and creating basic programs to meet clinical and client expectations and modification of programs to accommodate client's limitations.
	Therapeutic Exercise Progressions for the Upper and Lower Body- First Line Education	First Line Education Inc. offers this as a two-day online course. You've finished your assessment – now what? Learn how to choose what exercises to start your clients with and how to progress these basic exercises through to challenging patterns with increasing complexity. These exercises have

		been tested for years with equipment ranging from just a client's body weight to inexpensive pieces you can take with you in your backpack or a rolling suitcase.
	<u>Pereira Patterns: 36 Simple Movement Patterns For Better Motor Control- First Line Education Inc.</u>	First Line Education Inc. offers this as a one-day online course. Experiment with a series of 36 different movement patterns for better motor control in any body. These short patterns of three to five movements can be strung together like LEGO blocks or plugged in separately as needed throughout your clients' exercise programs. The patterns are simple – but not always easy. Come have some fun!
	<u>Nutritional Considerations For Breathing & Movement- First Line Education Inc.</u>	First Line Education Inc. offers this one-day course either online or in-person. You will learn the main considerations in whole food nutrition, improved digestive function, mindfulness, physical activity, and self-care to feel better and be more productive.
	<u>The Benefits of Breathing, Meditation & Relaxation- First Line Education Inc.</u>	This is a two-day course offered through First Line Education Inc. either online or in-person. An extensive exploration of the physiology of breathing will examine the effect of the breath on heart rate, blood pressure, meditation, focus, concentration and learning. Understand the interaction between your breath, your organ function, the nervous systems, stress, and on drastically reducing or eliminating sleep issues like snoring and sleep apnea. This course is designed to give you the chance to experience a variety of meditation styles, breathing techniques and chanting.
	<u>Assessment and Exercise Interventions for the Low Back and Lower Extremity- Movement First</u>	This is a two-day hands-on workshop offered through Movement First. You will learn how to use evidence-based, validated tests and clinical prediction rules to deliver a structured examination of the lumbar spine and lower extremity. Identify both common and non-MSK conditions to maximize outcomes using a Treatment-Based Classification System. Gain valuable clinical decision-making and practical skills to deliver and progress the program from the initial stages of recovery through to return-to-work and sport.
	<u>Assessment and Exercise Interventions for the Cervicothoracic Spine and Upper Extremity- Movement First</u>	This is a two-day hands-on workshop offered through Movement First. As the counterpart to the Low Back and Lower Extremity course, this course teaches you the evidence-based, validated tests and clinical prediction rules to deliver a structured examination of the cervicothoracic spine and upper extremity. Identify common and non-MSK conditions to maximize outcomes using a Treatment Based Classification System. Combined with the Low Back and Lower Extremity Course, these will give you the confidence to assess and treat clients from the pain control stage through to a safe return to work and sport.

	Beyond the Core: Assessment and Exercise Interventions for Chronic Conditions of the Spine and Extremities- Movement First	This is a two-day hands-on workshop offered through Movement First. Broaden your knowledge in MSK assessment and treatment to maximize your clients' recovery. Learn how to assess and treat clients with chronic conditions including: inflammatory conditions, such as Ankylosing Spondylitis; lumbar and joint replacement surgery; adolescent & adult scoliosis; and medical interventions for cancer. Sharpen your clinical assessment and critical decision making skills. Create and deliver interventions using a Motor Control Exercise approach to address movement impairment and postural control issues.
	Barefoot Training Certification Level 1-EBFA (Evidence Based Fitness Academy)	These are live and hands-on seminars offered by EBFA. Explore how to prepare the body for movement by tapping into the nervous system with barefoot science, foot to core sequencing and reflexive stability via fascial lines. With the foot as the only contact point between the body and the ground, this complex structure plays a critical role in the way in which the body stabilizes during dynamic movement. Learn concepts such as foot and ankle biomechanics, open and closed chain foot assessments and correctives, footwear science, and much more!
Patient and Client-Centered Care 	Registered Nurses Association Best Practice Guideline- Person and Family Centered Care	This guideline is to be used by nurses and other members of the inter-professional healthcare team to enhance the quality of their partnership with individuals accessing care, ultimately improving clinical outcomes and the person and family's experience of care.
	Health Expectations International Journal- Family Centered Care	Article reports key findings on shift of family-centred care, management and advocacy responsibilities to families.
	Ontario Medical Association Policy Paper- Client Centered Care	In this paper, patient-centred care research is reviewed from both the system standpoint and the practitioner standing, including research and experience in other jurisdictions, and challenges to providing patient-centred care.
	The College of Family Physicians of Canada- In Home Patient Centered Care	The objective of this paper is to provide guidance to family physicians on implementing patient-centred care in family practice settings and involves actively engaging patients when helping them make care decisions.
Patient Safety	Canadian Patient Safety Institute- The Safety Competencies	The Safety Competencies Framework is designed to help health providers build a safe, relevant health service for patients. Includes downloadable Safety Competencies PDF.
	Canadian Patient Safety Institute- Shift to Safety	Established and funded by Health Canada in 2003, the Canadian Patient Safety Institute works with governments, health organizations, leaders and healthcare providers to inspire extraordinary improvement in patient safety and quality.

	Agency for Healthcare Research and Quality-Quality Improvement and Patient Safety	<p>Chapter on implementing quality improvement strategies and tools to emphasize patient safety.</p>
<p>Professional Responsibilities</p> 	Canadian Medical Protection Agency- The Canadian Medical Liability System	<p>Article outlining the Canadian medical liability system and what makes it work, and how it is evolving to respond to the changing needs of the system.</p>
<p>Record Keeping</p> 	College of Physiotherapists- The Purpose of Record Keeping	<p>A module that outlines the responsibilities and accountabilities physiotherapists have when record keeping.</p>
	College of Occupational Therapists-Record Keeping	<p>A module that outlines the importance of record keeping and the responsibilities and accountabilities that occupational therapists have to the public.</p>
<p>Health Promotion</p> 	Government of Canada- Health Promotion	<p>The Public Health Agency of Canada addresses such topics as healthy child development, active living, family violence prevention, obesity, physical activity, mental health, population, rural and senior's health.</p>
	Government of Canada- Canadian Best Practices Portal	<p>The Portal was developed as a guide to plan programs for promoting health and prevention of chronic disease geared towards specific populations and communities.</p>
	Ontario Public Health Association- Nutrition Resource Centre	<p>The Nutrition Resource Centre strengthens the knowledge of healthcare providers by providing resources to those who wish to learn and educate others about healthy eating and nutrition.</p>
	Canadian Kinesiology Alliance Conference	<p>This is a national event to raise awareness of the profession by aligning organizations such as CLHIA with CKA goals. Speakers at this conference will target areas such as: rehabilitation, physical fitness, health at work and promotion of healthy lifestyles.</p>

	Research Institute for Aging-Cultural Diversity in Long Term Care	The report summarizes the findings from a needs assessment to explore strategies to better support cultural diversity in long-term care homes.
	Aboriginal Sexual Health-Health Professionals Working with First Nations, Metis women and their Families	An innovative guideline to give healthcare practitioners a better understanding of how to provide culturally-safe care to Aboriginal Peoples throughout Canada.
Program Evaluation  	Public Health Ontario- Program Evaluation	A document that is designed to provide an overview of key concepts and strategies used to conduct program evaluation through a 10-step model.
	Journal of Preventing Chronic Disease- Six Steps for Program Evaluation	A framework that recommends six steps for an effective program evaluation.
	Centre for Disease Control- Framework for Program Evaluation	This guideline is designed to summarize and organize essential elements of program evaluation, and encourages an approach to evaluation that is integrated with routine program operations.
Leading Research Initiatives 	Sick Kids Hospital- Research Ethics Board	Core principles of research ethics (process of initial and ongoing review and monitoring of research involving human participants to ensure ethical acceptability), and working with a Research Ethics Board (independent committee of people with varied backgrounds who use their knowledge and expertise to examine the research study from the perspective of prospective participants).
	John Creswell- Research Design	John Creswell was previously a professor in educational psychology and has published many articles and books. In this book he discusses key elements of the research process, review of theory and use of ethics in research.
	What researchers mean by...	Institute for Work & Health index of common research terms used in the health and social sciences are explained for readers in simple language using everyday examples.

<p>Code of Ethics and Practice Standards</p> 	<p>Health Canada- Good Clinical Practice</p>	<p>Clinical guidelines adopted by Health Canada for use by healthcare professionals. Health Canada has the responsibility for the inspection and investigation of clinical trials that were adopted in January 2000 which later provided a clear framework for the performance of clinical trials in Canada. The main objective is to reduce risks to subjects and for inspections to be used in the evaluation of submissions.</p>
<p>Privacy and Confidentiality</p> 	<p>Information and Privacy Commissioner (IPC) of Ontario</p>	<p>The IPC upholds and protects access to information and privacy rights in Ontario. Includes information on collection, use and disclosure of personal health information; safeguarding personal health information; lock boxes and reporting privacy breaches, etc.</p>
	<p>College of Physiotherapists- Privacy</p>	<p>Healthcare professionals must follow the rules of the <i>Personal Health Information Protection Act (PHIPA)</i>, which governs the collection, use and disclosure of personal health information. Also provides information on what you may need to know about privacy breaches.</p>
<p>Professional Boundaries</p> 	<p>Prevention of Sexual Abuse e-Learning Module</p>	<p>The College of Kinesiologists of Ontario’s e-learning module will help you better understand what constitutes a boundary violation and sexual abuse, how to recognize warning signs and how to act on them to protect the client; and what to do if boundary violations occur. The module will also help you understand your mandatory reporting obligations and how to respond to concerns of sexual abuse appropriately.</p>
	<p>Professional boundaries webinar</p>	<p>The College of Kinesiologists of Ontario’s webinar on professional boundaries.</p>
	<p>Article- Social media use by R.Kins</p>	<p>The College of Kinesiologists of Ontario’s article on social media use.</p>
	<p>Article- Giving and receiving gifts</p>	<p>The College of Kinesiologists of Ontario’s article on giving and receiving gifts.</p>
	<p>College of Psychologists- Professional Boundaries</p>	<p>Document outlining the framework within which the therapist/client relationship occurs and defines the characteristics of professional boundaries within healthcare relationships.</p>

<p>Business Development, Financial Stewardship and Management and Soft Skills/Administration</p> 	<p>90 Day Clinical Practice Mentorship- First Line Education Inc.</p>	<p>Just starting your practice? Shifting from employee to entrepreneur? Interested in getting a side hustle going? The First Line team will walk you through 90-days of online videos, weekly group calls and weekly one-on-one support calls. Nine practice-specific modules each contain four lessons. Three spaced out “Implementation Weeks” will help you get the most from the program materials and experiences. Get downloadable swipe files, worksheets, assessment and exercise therapy templates, and done for you client forms. It’s all here!</p>
	<p>Jump Start (or Pivot!) Your Practice Online- First Line Education</p>	<p>Want to set up your own business? In this one-day online workshop, learn how to name and register your business, get your tax accounts set up, organize your office, select your record keeping system, plug into a network, and organize your promotional materials.</p>
	<p>How to Create Lifetime Loyal Clients- First Line Education</p>	<p>This is a one-day online workshop with First Line Education Inc. Get clear on your practice vision, learn about how to identify your ideal client, see where to find the best clients for you and how to look after your clients once you have them. Full of tips and tricks to build your business – your way!</p>
	<p>College of Physiotherapists- Improving Care Delivery Through Communication</p>	<p>Talking and listening to patients is the most common procedure a clinician will employ. Learn the six keys to successful communication.</p>
<p>Communication</p> 	<p>Health Canada: Talking Tools II- Putting Communication Skills to Work- Interactive Course for Practising Physicians</p>	<p>Resource booklet on communication skills.</p>
	<p>College of Physiotherapists- Improving Care Delivery Through Communication</p>	<p>Learn key communication performance indicators.</p>
<p>Managing and Supervising Support Personnel and Students</p> 	<p>College of Audiologists and Speech Language Pathologists Position Statement- Supervision of Students</p>	<p>This position statement sets out supervision requirements for students.</p>
	<p>Statistics Canada- Adult Learning in Canada</p>	<p>Research on characteristics of adult learners in Canada. The government has provided research on the data that has been collected to publish comparable measures on adult learning in four skill domains: prose and document literacy, numeracy and problem solving. These lifelong principles take place from three basic categories of settings which include formal and informal learning types.</p>

	Ontario Government- Accessible Information and Communication	The Ontario Government has implemented strategies to make information and other forms of communication more accessible and easy to use for people with disabilities.
Counselling and Coaching Strategies 	Winnipeg Regional Health Authority- Health Behaviour Change	Workbook with theories, models and strategies designed to help healthcare providers have conversations with patients about behaviour change in healthcare settings.
	Canadian Association for Mental Health- Motivational Interviewing	Motivational interviewing is defined as a collaborative conversation style for strengthening a person's own motivation and commitment to change. This course explores the effectiveness of motivational interviewing, how it is used and how it works in improving the care of patients.
	Manage with Motivation by Health Communication Lab	Online motivational interviewing course for registered healthcare professionals.
Webinars	The Change Blueprint: Four Pillars of Self Care- First Line Education	Over four weeks join four different hosts for one-hour webinars. We're chatting about four ways you can show up for yourself- in a BIG way! Week One: Vulnerability; Week Two: Nourishment; Week Three: Resilience; Week Four: Optimization.
	Build Resilience Through Self Awareness- First Line Education	Join kinesiologist Allysha Jindal for four weekly one hour webinars. Week One: Resilience & Stress; Week Two: Cognitive Behavioural Perspectives; Week Three: Self-Awareness and Mindfulness; Week Four: Self Care and Coping.
	Fascinating Facts About Fascia- First Line Education	Join respiratory therapist, registered massage therapist and yoga teacher Simone Nitzan and kinesiologist, holistic nutritionist and yoga teacher Angela Pereira for four weekly one hour webinars. Week One: Fascial Foundations, Myofascia and Biotensegrity; Week Two: Breathing, Your Nervous System and Fascia; Week Three: Nourish Your Body, Feed Your Fascia; and Week Four: Fascia In Motion
